PROJECT REVIEW : MILESTONE PROJECT – 1

Date: 16-04-2026

JOB PORTAL MANAGEMENT SYSTEM

SDG: SDG 9 – Industry, Innovation and Infrastructure

Presented By:

Hemanth Koushik

Courses Handling Faculty:

Dr M MAGESHWARI

INTRODUCTION

1

Job Portal is a **web-based recruitment system** designed to connect job seekers and employers in a single platform

2

Eliminates traditional manual hiring methods

3

Provides:

4

Fast job discovery

5

Easy application submission

6

Efficient hiring process

7

Built using **modern UI (dark theme)** for better usability

8

Supports both:

9

Students (job seekers)

Employers (recruiters)

PROBLEM STATEMENT

1

Traditional hiring systems suffer from:

- Lack of centralized data
- Manual tracking of applications

2

Students face issues like:

- Difficulty finding relevant jobs
- No proper tracking system

3

4

Employers face:

- Difficulty managing multiple applicants
- No proper filtering system

5

6

7

Existing systems lack:

- User-friendly interface
- Real-time updates

8

9

Hence, a **smart job portal system** is required

OBJECTIVE(S)

1

To develop a **complete full-stack job portal application**

2

To provide:

- Easy job search functionality

- Efficient job posting system

3

To implement:

- Secure login authentication

- Role-based access control

4

5

6

To design a:

- Responsive and modern UI

7

8

To ensure:

- Data consistency and reliability

9

PROPOSED SYSTEM

The system consists of two main users:

1.Student/User

2.Employer/Admin

Core Functionalities:

User registration and login

Job posting and browsing

Application management

Dashboard analytics

System ensures:

Data validation

Secure access

Smooth interaction

PROPOSED SYSTEM ARCHITECTURE

PROPOSED SYSTEM ARCHITECTURE

◆ Input:

Users enter data such as login details, job search filters, and job postings.

This data is collected through the web interface (frontend).

◆ Processing:

The backend processes user requests and validates the input data.

It handles business logic like job posting, searching, and applications.

◆ Database:

Stores all system data including users, jobs, and applications.

Maintains relationships and ensures data consistency.

◆ Output:

Displays results such as job listings, dashboards, and application status.

Provides real-time responses to users based on their actions.

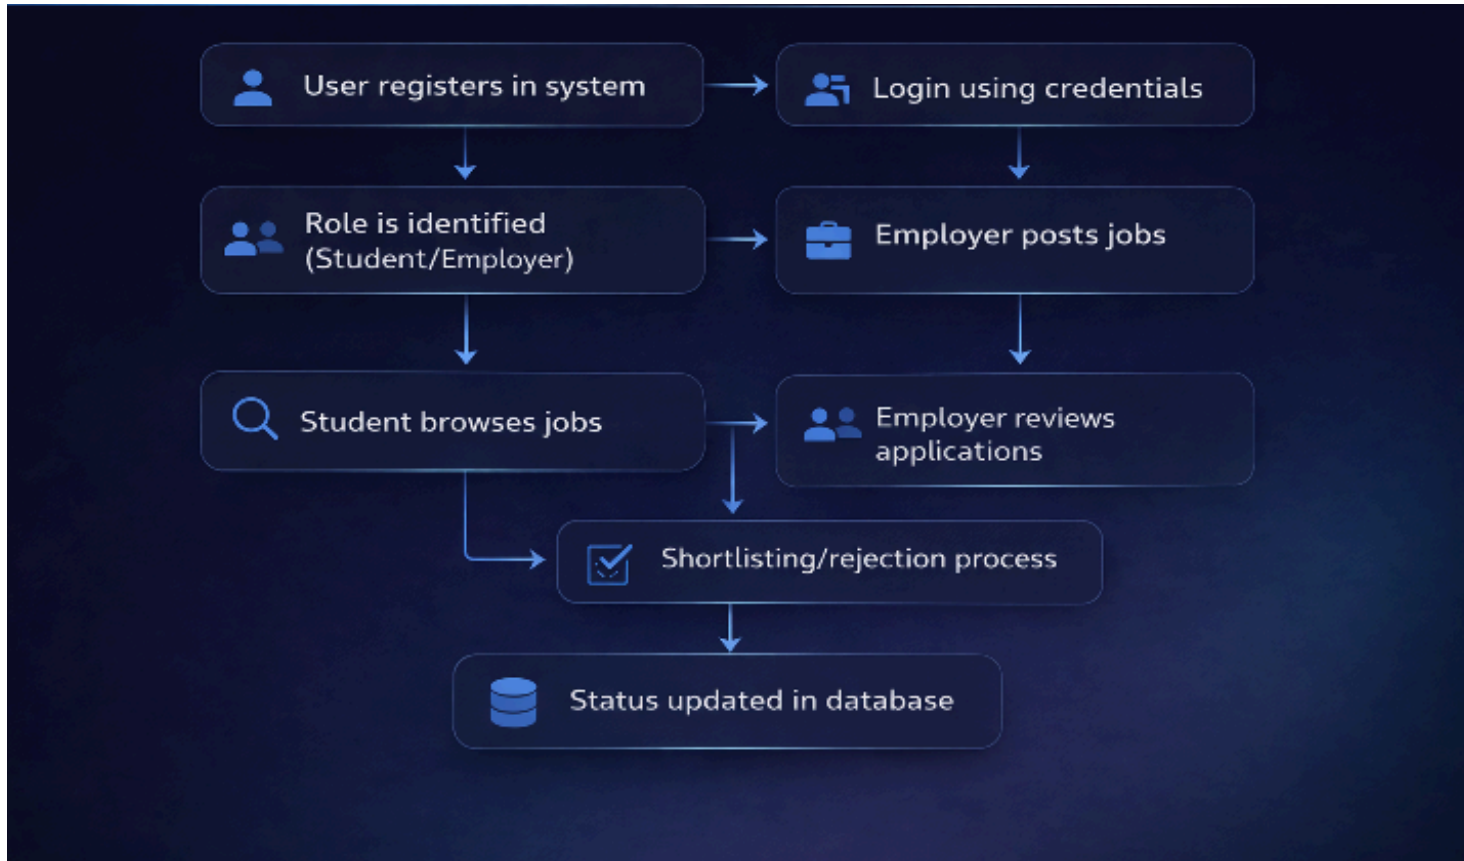

◆ Data Flow:

Data flows from user input → backend processing → database → output display.

Ensures smooth communication between all system components.

WORKFLOW

- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9

TECHNOLOGIES USED

1

Frontend: HTML, CSS, JavaScript

2

Backend: Java, Node.js (Express.js)

3

Database: MySQL

4

Security: Spring Security

5

6

Tools: Visual Studio Code, Maven

7

Hardware/Software Requirements: Minimum 4GB RAM, JDK 17+,
Web Browser

8

9

MODULE DESCRIPTION

1

Module 1: User Authentication:

- Secure login and registration
- Handles secure login by verifying username and password
- Role-based access (Student / Employer / Admin)

2

3

4

Module 2: Job Management:

- Employers can post, edit, delete jobs

5

6

Module 3: Application Management:

- Students apply for jobs, Track application status

7

8

Module 4: Search & Filter:

Filter jobs by:

- Location
- Skills
- Experience

9

IMPLEMENTATION SCREENSHOTS

6 <link rel="stylesheet" href="@{/css/style.css}" />
7 </head>
8 <body>
9 <div class="container page-grid">
10 <header>
11 <div>
12 <h1>Job Portal</h1>
13 <p class="section-description">Login to manage job applications, post new roles, or browse</p>
14 </div>
15 <nav>
16 <a th:href="@{/}">Home</a>
17 <a th:href="@{/register}">Register</a>
18 </nav>
19 </header>
20 <section class="hero">
21 <div>
22 <h1>Welcome back.</h1>
23 <p>Sign in to continue your career journey with a polished employer and student portal experience.</p>
24 <div class="hero-actions">
25 <a class="button" th:href="@{/register}">Create Account</a>
26 <a class="button" th:href="@{/}">Browse Jobs</a>
27 </div>
28 </div>
29 </section>
30 <section class="auth-form">
31 <h1>Sign In</h1>
32 <form method="post" th:action="@{/login}">
33 <div class="form-row">
34 <label for="username">Username</label>
35 <input id="username" type="text" name="username" required />
36 </div>
37 <div class="form-row">
38 <label for="password">Password</label>
39 <input id="password" type="password" name="password" required />
40 </div>
41 </form>
42 </div>
```

ADVANTAGES & LIMITATIONS

ADVANTAGES:

- User-friendly interface
- Fast and efficient system
- Centralized data management
- Secure authentication

LIMITATIONS:

- Requires internet connection
- Basic features in current version
- No AI-based recommendations
- Limited scalability without cloud
